SUMMARY

I run projects end to end: requirements gathering, scoping, and delivery across multiple stakeholders and providers. A Machine Learning Engineering & AI Project Management degree gives me the technical fluency to specify and prioritise AI products, not just coordinate them.

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications**: AWS Solutions Architect (SAA-C03)
- **Product & Project Management:** Requirements Gathering, User Stories, MVP Scoping, Agile/Scrum, Jira
- **Technical Fluency:** Python, SQL, NLP/LLM (HuggingFace), Cloud (AWS), MLOps
- **Soft skills:** Stakeholder Management, Team Coordination, Problem Solving, Communication, Adaptability
- **Language**: Native French, Bilingual English
- **Interests:** Karate, Hiking, Reading, Traveling

WORK EXPERIENCES

Rochondra Lab **Feb 2026 - Present**
Founder & Product Owner *Remote, France*
Built a tool that turns a crypto project's technical whitepaper into a short set of comparable scores, reducing assessment from hours to minutes

- Defined scope and roadmap, mapping four measurement areas and prioritising one as the MVP
- Evaluated cost vs. quality trade-offs across the stack, balancing managed AI services against self-hosted models to keep prototype spend sustainable
- Designed the prototype around the end product, anticipating storage and analysis needs of a later deployment
- Translated academic research (Journal of Banking & Finance, Management Science) into product requirements and evaluation indicators, and into articles for a non-specialist audience

Telus Digital AI **Feb 2025 – Sep 2025**
Data Quality Analyst *Remote, France*

- Evaluated AI/LLM outputs against product quality guidelines across multilingual and multimodal use cases, developing a practical sense of what "good" looks like for AI-driven products in production
- Expanded scope to new task types (geolocation, generative AI across image, text, and audio) through continuous upskilling, giving a direct exposure to how AI products get evaluated at scale

Fox Security **Nov 2020 – Sep 2022**
Project Manager *Brest, France*

- Gathered and translated stakeholder requirements (direct clients and public tenders) into technical specifications, aligning them against sector-specific constraints across France and Europe
- Owned delivery end-to-end, consolidating input from multiple specialized providers into unified documentation and coordinating written and physical deliverables
- Closed the loop with client-facing teams by relaying structured findings back, ensuring proposals stayed accurate and on schedule

KZ International Group **May 2017 – Sep 2020**
Project Coordinator *Brest, France*

- Identified inefficiencies in warehouse operations and drove a 15% cost reduction by streamlining processes and renegotiating supplier terms
- Coordinated cross-functional seasonal teams of up to 12 people, managing day-to-day operational trade-offs (receiving, storage, staffing)

EDUCATION

Datascientest, certified by Mines Paris PSL **Aug 2023 – Jun 2024**
EQF Level 7 (Master's-level), Machine Learning Engineering & AI Project Management *Remote, France*

- Specialisation : Data Science, MLOps, AI Project Management, Agile Methodology

European Institute for Marine Studies **Sep 2010 – Jun 2012**
MSc Chemistry of the Marine Environment *Brest, France*
